The Village of St. Joseph was seeking input from our brick & mortar food establishments about allowing the operation of food trucks to our Village and how it would impact them.

The business owners/employees expressed their concerns and opinions and unanimously was opposed to allowing the operation of food trucks in the Village of St. Joseph. They stated they have expenses to pay including mortgages, rent, utility bills and the Village receives revenue from the sales tax. The food trucks do not have these expenses and they feel it would be detrimental to their businesses if the Village allowed them into our community.
